

# Special cables for medical technology

## Monitoring / information systems

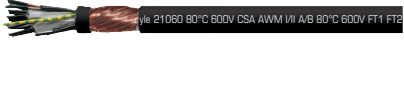

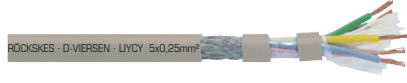

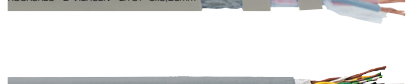

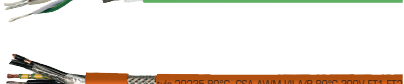

### BUS CABLES

WE CARE FOR A GOOD NETWORK

© sarawith / Fotolia

Based on the strong innovative power of medical monitoring and information techniques, SAB Bröckskes developed a high amount of new cable solutions. Particularly progressive are the applications of linked surgery systems. Depending on the use, we can offer for example high flexible CAT5, CAT6 and CAT7-cables with temperature and chemical resistance as well as drumable and robot suitable variations.
