

Special cables for medical technology

Sterilization and disinfection

RELIABLE PRODUCTS FOR
SAFE CLEANLINESS

© FIMMik / Fotolia

For the application of sterilization and disinfection we produce connection cables and products for temperature measurement. The often used PT100/PT1000 and NTC sensors are manufactured with highest precision. Steam-tight versions are possible as well as autoclaveable connection cables, even with international standards.

Product range

| | | |
|---|-----------------------------|---|
|  | UL/CSA cables |  |
|  | Silicone cables |  |
|  | COAX cables |  |
