

Special cables for medical technology

Surgery robot systems

THE SPECIALIST
FOR RELIABILITY AND VARIETY

© Meister Video / Fotolia

Surgery robot systems have the demand of high mechanic requirements as well as million cycles of torsional and bending movements. To fulfill these high requirements we check our products with our in-house test systems regarding performance and durability. The combination of different insulation and sheath materials allows the use of various disinfectants and cleaning substances up to autoclaveability and clean-room application.

Product range

	Robot cables	
	Torsion cables	
	UL/CSA cables	
	Silicone cables	
	COAX cables	
	Helix cables	
	Cable harnessing	
	Control cables	
	Fluoroplastic cables	
	Cleanroom cables	
	Bus cables	
	Data cables	
	Hybrid cables	
	Resistance sensors	
	Sensor cables
