CONNECTION AND WIRING CABLES FOR DURABLE ILLUMINATION

© penngauß / Fotolia

Above all in the medical lighting industry cables are needed that withstand high and fluctuating ambient temperatures up to + 180°C. For this application SAB Bröckskes offers a broad range of Besilen insulated cables and strands. These are particularly used for the inner wiring of lamps and devices as well as for the wiring of switch and distribution boards with low mechanical stress.
